

Introduction to PyTorch

What we will be covering in this module?

What we will be covering in this module?

- Introduction to PyTorch

What we will be covering in this module?

- Introduction to PyTorch
- How PyTorch is different from keras

What we will be covering in this module?

- Introduction to PyTorch
- How PyTorch is different from keras
- Basic mathematical and matrix operations in PyTorch

What we will be covering in this module?

- Introduction to PyTorch
- How PyTorch is different from keras
- Basic mathematical and matrix operations in PyTorch
- Neural Network from scratch in PyTorch

What we will be covering in this module?

- Introduction to PyTorch
- How PyTorch is different from keras
- Basic mathematical and matrix operations in PyTorch
- Neural Network from scratch in PyTorch
- Important PyTorch modules (autograd, nn, optim, etc.)

What we will be covering in this module?

- Introduction to PyTorch
- How PyTorch is different from keras
- Basic mathematical and matrix operations in PyTorch
- Neural Network from scratch in PyTorch
- Important PyTorch modules (autograd, nn, optim, etc.)
- Solving image classification problem using MLP in PyTorch

What we will be covering in this module?

- Introduction to PyTorch
- How PyTorch is different from keras
- Basic mathematical and matrix operations in PyTorch
- Neural Network from scratch in PyTorch
- Important PyTorch modules (autograd, nn, optim, etc.)
- Solving image classification problem using MLP in PyTorch
- Implementing CNN in PyTorch to solve image classification problem

What we will be covering in this module?

- Introduction to PyTorch
- How PyTorch is different from keras
- Basic mathematical and matrix operations in PyTorch
- Neural Network from scratch in PyTorch
- Important PyTorch modules (autograd, nn, optim, etc.)
- Solving image classification problem using MLP in PyTorch
- Implementing CNN in PyTorch to solve image classification problem
- Transfer Learning in PyTorch

What we will be covering in this module?

- Introduction to PyTorch
- How PyTorch is different from keras
- Basic mathematical and matrix operations in PyTorch
- Neural Network from scratch in PyTorch
- Important PyTorch modules (autograd, nn, optim, etc.)
- Solving image classification problem using MLP in PyTorch
- Implementing CNN in PyTorch to solve image classification problem
- Transfer Learning in PyTorch
- RNN and LSTM in PyTorch

What we will be covering in this module?

- Introduction to PyTorch
- How PyTorch is different from keras
- Basic mathematical and matrix operations in PyTorch
- Neural Network from scratch in PyTorch
- Important PyTorch modules (autograd, nn, optim, etc.)
- Solving image classification problem using MLP in PyTorch

3. More popular amongst researchers

How is PyTorch different from Keras?

How is PyTorch different from Keras?

Comparison Factor	Keras	PyTorch

How is PyTorch different from Keras?

Comparison Factor	Keras	PyTorch
Level of API	High-level API	Lower-level API

How is PyTorch different from Keras?

Comparison Factor	Keras	PyTorch
Level of API	High-level API	Lower-level API
Speed	Slow	High

How is PyTorch different from Keras?

Comparison Factor	Keras	PyTorch
Level of API	High-level API	Lower-level API
Speed	Slow	High
Dataset	Small	Large

How is PyTorch different from Keras?

Comparison Factor	Keras	PyTorch
Level of API	High-level API	Lower-level API
Speed	Slow	High
Dataset	Small	Large
Architecture	Simple, Readable	Complex, less readable

Tensors

Tensors

- Tensors are multidimensional arrays.

Tensors

- Tensors are multidimensional arrays.
- PyTorch tensors are similar to NumPy's n-dimensional arrays.

Tensors

- Tensors are multidimensional arrays.
- PyTorch tensors are similar to NumPy's n-dimensional arrays.
- Can be used on a GPU as well

Thank You
