

Selecting Activation Function

Recap: Activation Functions

- Linear Activation function
- Sigmoid and Tanh activation functions
- ReLU and Leaky ReLU activation functions
- Softmax activation function

Selecting Activation Functions

Selecting Activation Functions

- Linear Activation Function
 - Used for regression problems
 - Used at the output layer

Selecting Activation Functions

- Linear Activation Function
- Sigmoid Activation function
 - Returns probabilities
 - Used at the output layer

Analytics Vidhya

Selecting Activation Functions

- Linear Activation Function
- Sigmoid Activation function
- ReLU and Tanh
 - Non-linear functions
 - Used at the hidden layers

Selecting Activation Functions

- Linear Activation Function
- Sigmoid Activation function
- ReLU and Tanh
- Softmax Activation function
 - Returns probabilities for each class
 - Used for multiclass classification
 - Used at the output layer

Thank You
