Attempts to Interpret a Neural Network
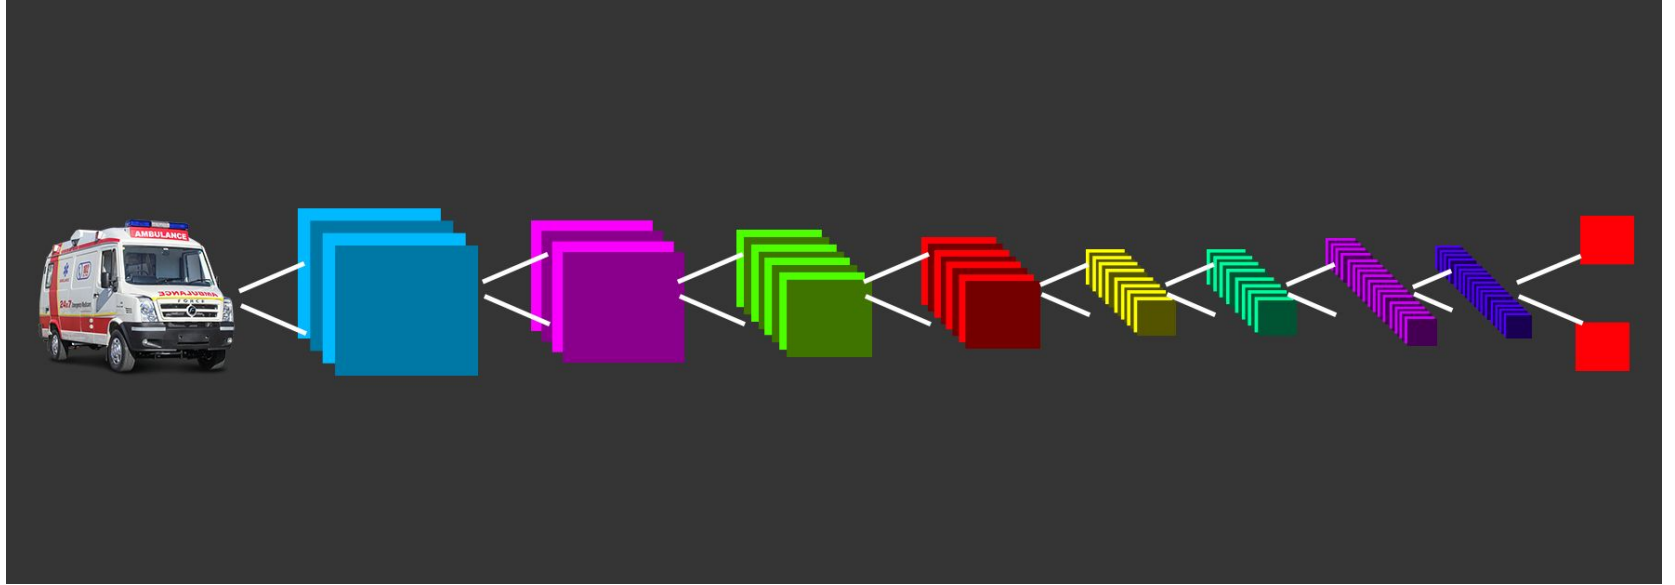

Attempts to Interpret a Neural Network

We can

- Understand the model architecture
- Visualize the filters / weights
- **Extract the output of intermediate neurons / layers**
- Locate important parts of the image according to the model

# Attempt 3 - Extract the output of intermediate layers

Attempt 3 - Extract the output of intermediate layers

Attempt 3 - Extract the output of intermediate layers

Attempt 3 - Checking Output of Intermediate Layers

Thank You
